

HSE BULLETIN

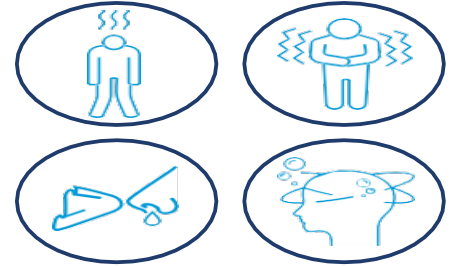

Issue 40, Dec 2020

Adverse Weather

HEALTH EFFECTS

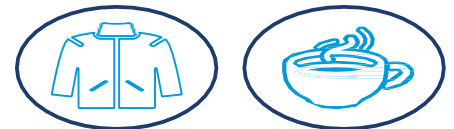

Working in Winter can increase the risk of developing the following health conditions which can result in incidents

- **Fatigue and loss of focus**
- **Hypothermia**
- **Colds, seasonal flu and respiratory illnesses**
- **Sea Sickness in winter weather for marine transport**

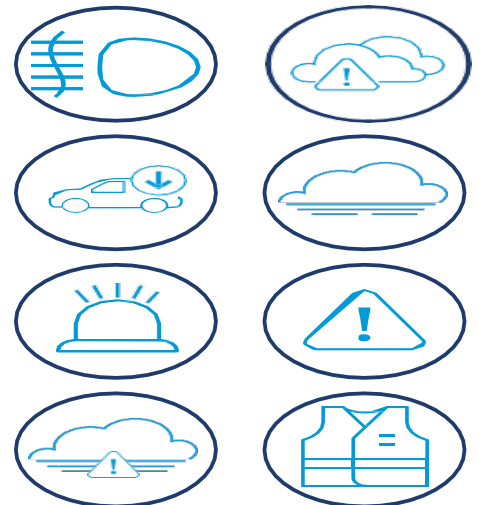

Outdoor activities can expose employees to several safety hazards ensure the following requirements along with COVID-19 guidelines.

- **Wear the right clothing**
- **Plan breaks from the cold**
- **Follow the Life-Saving Rules**

DURING FOG YOU SHOULD

- ✓ Monitor weather conditions regularly and follow weather notifications via the official authorities.
- ✓ Issue notifications to all employees to use fog lights during travel.
- ✓ Communicate cautions for unexpected areas of fog when vehicle movement is authorized.
- ✓ When needed, restrict and control speed for vehicle movement.
- ✓ Provide appropriate high visibility clothing for outdoor employees working on site.
- ✓ Ensure clear and visual indications are activated.
- ✓ Be aware of warning alerts on site.
- ✓ Fog is a concern for onshore and offshore transport due to the risk of collision as well as causing delays.
